## SENIOR PRODUCT DESIGNER, DEMAND — PARIS, FRANCE

Dear BlaBlaCar Design team,

I'm writing to apply for the Senior Product Designer, Demand role in Paris. What draws me to BlaBlaCar is the mission of filling empty seats across Europe — turning carpooling, buses, and trains into one trusted multimodal network that is cheaper, more human, and better for the planet. The Demand side of that journey, from search through booking and support, is exactly the surface I've been designing for the last two years.

As Senior Product Designer at SnappTrip — Iran's largest online booking platform for flights, buses, and trains — I own the end-to-end passenger journey across transport verticals. I overhauled filtering and search across our modes, driving a **3X increase in filter conversion rate**. I ran A/B testing on solution cards and listings that delivered a **10% uplift in booking conversion**. On the support side, I redesigned cancellation flows for flights, buses, and trains and **reduced support contacts per ticket by 30%** while raising self-service resolution. These are the same levers the Demand squad is pulling at BlaBlaCar: finding the right trip quickly, converting the booking, and keeping riders self-sufficient when plans change.

I'm ready to relocate to Paris and am looking for an employer that supports a work visa for France. BlaBlaCar's multimodal, mission-driven product is where I would like to spend the next phase of my career, and I'd love to contribute to the Demand team's roadmap, A/B pipeline, and craft bar.

I'd welcome a conversation about how my travel and mobility design experience could support BlaBlaCar's growth.

Warm regards,

**Farzaneh Abasnezhadford**
