SENIOR PRODUCT DESIGNER, K4B — BERLIN, GERMANY

Dear KAYAK Hiring Team,

I'm writing to apply for the Senior Product Designer, K4B role in Berlin. KAYAK's role as the search layer travelers trust, and your push into corporate travel through KAYAK for Business, is exactly the kind of problem space I want to design in next: dense booking data, high-stakes trip decisions, and the balance between consumer-grade polish and the policy, approval and reporting rails that make corporate travel actually work.

For the past two years I've been Senior Product Designer at SnappTrip, Iran's online travel platform for flights, buses, and trains. The impact that lines up most directly with K4B:

- I overhauled filter and search UX across travel verticals, driving a **3X increase in filter conversion rate** — directly relevant to the dense multi-mode results pages KAYAK is known for.
- A/B tests I led on solution cards delivered a **10% uplift in conversion**, grounded in behavioral data and reviews signals.
- I redesigned cancellation and self-service flows for flights, buses and trains, **cutting support calls per ticket by 30%** — the kind of post-booking workflow that corporate travelers (and travel managers) feel the sharpest.

I've worked daily with Product, Engineering and Data to ship inside a design system, and I'm comfortable with the hybrid, cross-time-zone rhythm the K4B team runs on.

Berlin is where I'd like to build this next chapter. I'm based in Tehran and would need visa sponsorship (German/EU Blue Card route) — I'm ready to relocate as soon as paperwork allows, and KAYAK's hybrid Berlin setup fits exactly what I'm looking for.

Thank you for considering me — I'd love to walk you through the SnappTrip filter and cancellation case studies.

Warm regards,

Farzaneh Abasnezhadford
